* Some medications widely used in the clinical management of UC, such as prednisone or hydrocortisone, are not listed in the SIGTAP Table. This is because they belong to the Basic Pharmaceutical Care Component (CBAF), whose Funding is provided through the Primary Care funding block, rather than through outpatient services linked to specific procedures. As a result, these medications do not have individual codes for registration or billing in the SAI/SIH/SUS systems, but are made available by pharmacies at primary care facilities according to standardized local lists.
