Sex Education for Children

...Nature and Nature’s God

It is not good to be deprived of childhood. Check "Nature and Nature’s God": Sexuality is a private body function like toileting and hygiene. Its purpose in nature is “reproduction”. It is not entertainment. It is not recreation. It is not simple-minded squirting or sliming any way with any one. In nature, it is “reproduction” consistent, otherwise, it is pollution. For humans, that means sexuality is confined to marriage and still consistent with “reproduction.” Doing sex before adulthood and marriage is to lose your childhood, hurt yourself, hurt others, and diminish your adult marriage and family life, because unnatural “sex” becomes separated from genuine “love”. Your childhood should be a time of growth, self-development, learning responsibility, education, without adulthood which is filled with yulk and work which destroys childhood. Any one telling you different wants to own you and exploit you. Children have more to do and more to learn than playing with genitals.

Abortion and contraception have made children to be expendable, unnecessary and unwanted to the point of death. This is because abortion and contraception make reproduction (and babies) unwanted, which turns sex activity into unnatural masturbation which is really excretion and pollution rather than “sex”. The liberal culture of masturbation results in the unnatural redefining of humans as “genders” based on one’s preferred type of masturbation rather than “male or female having to do with reproduction” as in all nature. Children must know they are being lied to about sexual activity, recruited to do what is unnatural, and then exploited by genital maniacs pretending to be “normal”.

Humans need to relearn what genuine sexuality is for the planet, the animal kingdom, and the universe, because Nature’s laws for sexuality are as clear as laws for gravity.

Planetary norms for sexuality for subhuman creatures are very clear, in that higher creatures are bio-chemically governed by pheromones. In nature, pheromones, unless biochemical disturbance, confine sexual activity to a time of likely reproduction between two adult opposite sex members of the same species.

There is basically no sexuality with the immature, with same sexed creatures, or with other species—and books and people that say otherwise are wrong and often are sick and denying their sicknesses. The gay cult especially promotes their genital manias, rationalizes all their activities, parades their disorders even sicknesses. The gay cult especially promotes their genital manias, which destroys childhood. Any one telling you different wants to own you and exploit you.

It takes only a moment to realize Nature’s wisdom: Subhuman animals without pheromones to control sexuality, would be doing what humans are now doing without marriage and love—The planet would be nothing but masturbating animals. And if humans forced animals to do what humans now do sexually, it would be animal cruelty.

It is important to know that the unnatural sexuality of today’s humanity is due to the acceptance and promotion of abortion and contraception. Abortion and contraception enable the consequences of unnatural sexuality:

i. The loss of one’s identity by not being true to oneself as born and to Nature;
ii. The unnatural creation of many so-called “genders” of one’s self-proclaimed preferred way of sexual pleasure;

iii. The destruction the family, especially due to loss of paternity and good fatherhood;

iv. The destruction of childhood as children are subjected to adult sexuality and violence;

v. The conversion of women into betrayers of other women by seeking sex with other women’s husbands;

vi. The diminishing of genuine femaleness as naturally reproduction-consistent on the planet;

vii. The creation of a psychotic-like society of obsessive-compulsive genital squirt-slime manics and body dysmorphic disorders;

viii. The conversion of press and media into betrayers of Nature by genitalized or violent excitement in order to manipulate the people to be clones of editors;

ix. And the perversion of politicians and government law into betrayers of the Constitution by the promotion of abortion and contraception which remove humanity from Nature; and

dx. Abortion and contraception remove mankind totally from evolution with destruction of millions of potential “natural selections”.

Love based marriage was human sexual education, but now, unnatural dupes of the gay cult have taken over. Under the guises of free speech and open criticism of society, the gay cult imposes its subculture all the while intolerantly refusing free speech by prohibiting open criticism of itself as an obvious disease for society. Most just want to “make nice” so they succumb to obedience to authority proclaiming “evil can be good” if you follow the latest “propaganda” in public relations promos. And the consequence of authority proclaiming “evil can be good” if you follow the latest “propaganda” in public relations promos. The children will pass through to full genuine maleness for boys and femaleness for girls, all of which is in their best interest by nature, family and culture.

V. All ages from childhood through adulthood are susceptible, in varying degrees, to body dysmorphic disorder which is the chronic abnormal use of a body part. Basically, the body offers self-pleasuring for itself, i.e., almost anybody can be a focus of habitual self stimulation. A minimal extreme is the pleasant scratching oneself. A maximal extreme is the “pleasure” of full hand vaginal or anal “fisting” of lesbians and homosexuals. When habituated to an obsessive/compulsive degree, such body dysmorphic disorder is clearly an abnormality because of inappropriate misuse of a body part from its natural function. Gay body dysmorphic disorders are an epidemic because of the habituating impact of body pleasure. But it becomes a cultural delusion and a political force of derangement. Nevertheless, when presented in public, body dysmorphic disorders should be illegal because they are truly “disturbances of the peace”--at least in terms of the violation of norms of privacy.

VI. Sexual activity is anatomically related for the most part in a normal fashion with the excretory system. Indeed, the genitals comprise excretory and reproductive functions as anatomically related and nearly identical. Thus it is not inappropriate to recognize genuine sexuality as the copulations between the adult opposite sex members of the same species. But when sex acts do not meet that criteria, the acts are excretory functions, i.e., appropriately named “sexcretion”--a pseudo sex act for relief and not consistent with reproduction in Nature. Non-marital sex acts are “sexleting” (analogous to “toileting”).

**Conclusion**

In conclusion, children need to hear the facts of sexuality on the planet. Humans have a better culture, society and family life when sexuality is kept as much as possible consistent with planetary norms, and with “...Nature and Nature’s God”. Humans need to be warned that there is a psychosis of masturbation and body dysmorphic disorder epidemic which are politicized by the gay cult eager to recruit them, seduce them, parade with them, and disturb the peace with them as they act out their body obsessions and compulsions pretending that what is basically evil and wrong has been authoritatively decreed to be “good.” Children need to know that sex outside of marriage is basically unnatural and anyone telling them otherwise is trying to exploit them and should be told that “I refuse to be your toilet.” “I will not be in your harem.” “I will not be your toilet.”

It is not good to be deprived of childhood. Sex is not part of it except “Sex is for reproduction and love in marriage. Don’t bother with it until then. Sex is part of the yuk and work of adults. Wait. You are not missing a thing except loss of your childhood.”

(The best study for “nature and nature’s God” are to look up on the World Wide Web the following: “Nature and God--University of Notre Dame”; “Feillard de Chardin”; and “Theogecocalculus.” And get my book, *Soul of the Earth...*)
