

# The origin of the intellect

## Editorial

Black Holes of anti-matter created the whole material world and the NEMF that separated the anti-matter of the Black Hole from the created material forms got imprinted on all material creations.<sup>1</sup> This made all material creations a material body and light NEMF. If the material body didn't have NEMF, all living beings couldn't be a material body and Spirit because the NEMF of the Spirit, which we see as aura, could only be attached to the NEMF of the material body. To magnetically attract each other the two NEMFs need to spin in opposite directions. Are there any measurements that show that this is exactly the case? Scientist in Belorussia developed equipment allowing him to measure the electromagnetic field of the aura and he was surprised to find that the field drop down to zero 15 cm from the surface of the body. This is where the two NEMFs with opposite magnetic polarity meet – the NEMF of the Spirit and the NEMF of the material body.

We are not consciously aware, but in our Subconscious a Quantum Computer operates with the waves of the nonlinear electromagnetic field (NEMF) of the Spirit, which I measured for almost 40 years.<sup>2-5</sup> Since our Spirit is a holographic template of the Hologram of the Creator, our Intellect is a holographic template of the cosmic intellect, which is copied in our Quantum Computer in the Subconscious. I also found that the NEMF called Spirit through the Quantum Computer in the Subconscious rules and regulates the functioning of all our organs. Since my measurement showed that the Spirit is emotion,<sup>3</sup> the Quantum Computer, which operates with the waves of the Spirit, allows the organs' functioning to be modulated by our emotions. For this reason, to access the Subconscious, and the Quantum Computer in it, strong emotions are necessary. We have different emotionality and the more emotional an individual is the higher are his chances to access the Quantum Computer, which contains the hologram of the cosmic intellect.

Since we see the NEMF of the Spirit as aura, Dr. Valerie Hunt, who worked at the University of California, measured the frequencies of the auras. She found that most of the people on Earth (~ 90%) have aura with frequency 200 Hz.<sup>6</sup> These are the people with low intellectual interest, for whom good food and good sex is enough to make them happy. They have low emotional sensitivity and do not have access to their Quantum Computer... and they would never believe such a thing exists. Thus, low emotional sensitivity goes hand in hand with low frequency of the Spirit (NEMF), low intellect, and lack of Spiritual interests. According to Valerie Hunt, the individuals with telepathic and clairvoyant abilities have frequencies of their aura (NEMF or Spirit) between 400 Hz and 800 Hz.<sup>6</sup> Since the aura is our Spirit, higher frequency of the aura (Spirit) of these individuals means that they are more spiritual and also more emotional. Since the Quantum Computer in the Subconscious works with the waves of the emotional Spirit, these highly spiritual and emotional individuals are obviously the ones that have access to the Quantum Computer with a secret treasure box with clairvoyant abilities, ability to connect telepathically, etc. (These people are Spiritual levels 9<sup>th</sup>, 10<sup>th</sup>, and 11<sup>th</sup>.<sup>7,8</sup> For higher Spiritual levels like Jesus (12<sup>th</sup>), the treasure box offers ability to heal the sick and revive the dead).

Thus, it worth to thrive to grow spiritually because this gives access to the treasures of the Quantum Computer – it allows to foresee the future, to see the past, to connect telepathically, etc. The way to

spiritually grow is by Loving, Forgiving, and Helping others.<sup>7</sup> As the person spiritually grows by Loving, Forgiving, and Helping others, the frequency of his Spirit grows, his emotionality grows, his access to the Quantum Computer grows, and as a result his intellect grows because he is having more and more access to the cosmic intellect. Thus, the teaching of Jesus to Love, Forgive, and Help others, which is the way to Spiritually grow, is also a way to grow intellectually.

However, intellectual growth is not the only benefit of Spiritual Growth. The HeartMath Institute in California<sup>10</sup> through EEG and ECG measurements found that meditation on Love makes the functioning of our brain and heart more harmonious, and harmonic functioning means good health. Therefore, thriving to spiritually grow by loving, forgiving, and helping others will not only help you to intellectually grow, it will make you healthier and since harmony means happiness, it will make you happier. Don't you think we should do our best to spiritually grow by loving, forgiving, and helping others?

But there is another factor here. We are taught in our schools and Universities that we should suppress our telepathic and clairvoyant abilities because our science says they don't exist. Our science is not developed enough and not interested in finding a way to measure the weak informational NEMF (Spirit). We have the technology that would allow us to measure the weak NEMF (Spirit). It is technically possible, if I created sensitive enough equipment allowing me to measure it. But our scientists don't seem to have the interest because developing the technology and measuring the weak NEMF, called Spirit, requires efforts and denying it does not take any efforts.

But if we make the efforts to measure the weak informational NEMF, called Spirit, we will not only unite Science and Religion, we will make a substantial step forward in our intellectual growth. Once we stop denying the existence of the Spirit and the related to the Spirit telepathy and clairvoyance, their presence in our life will become more substantial because the aborigines of Australia and Siberia use them more than we do. Also, the Quantum Computer in the Subconscious is the cradle of our intuitive creativity. Full intuitive creativity is a synchronous work at the same level of over-excitement of the Digital Computer of our Conscious and the Quantum Computer of our Subconscious.<sup>9</sup> This means that more use of the Quantum Computer will boost tremendously the intellectual level and development of our civilization.

More use of the Quantum Computer will also make us feel that we are not alone in this Universe – we are indelible part of it. It is high time to acknowledge that we have two programs of development – a material form (through the evolution of DNA capable to record and use the experience of previous generations) and a field form (through the evolution of our Spirit (NEMF), which also allow use of experience of previous generations) - from the two leading is the field form. The Institute of Rational Psychology in Munich, Germany, which studies the human brain since 1965 claims that our brain develop so fast, that after 50 years we will probably have different bodies.<sup>11</sup>

Here is the historical proof of it. The name ‘Noah’ means ‘New’. ‘The Book of Enoch’ reveals that the boy was named Noah because he was different from his parents. Noah’s father was disturbed by the fact that the boy does not look like him or his mother. The mother suggested asking Grandfather Enoch why he is different. Enoch explained to them that the boy was the prototype of the new type of man, who was to inhabit the Earth after a Big Flood. There would be a Big Flood and the boy is the chosen one to survive. Enoch suggested naming the boy Noah (New).<sup>12</sup>

Another proof that the intellectual level gives impact on the physical (material) body is the fact that elderly would say: “Don’t try to argue with me because I am a kid of an old goat.” Indeed, children of older parents seem to be more matured, wiser, and smarter. This proves that our DNA is not static, i.e. given once and forever, it seems to change with our life experience. The DNA recording life experience is probably what some scientist call “Junk DNA”. There is no “Junk DNA” there are only “Junk scientists”. The Supreme Intelligence that created us would not put “Junk” into our DNA. However, the “Junk scientists” probably believe that we came from the monkeys.

Another interesting question is when the intellect as such appeared on the planet Earth. Archeological findings in Siberia, Africa, Mongolia, and China all point to about 2 million years ago. What happened 2 millions years ago? Why did the intellect appear at distant points of planet Earth simultaneously? I found the answer in ancient Indian texts describing landing on Earth of Elian visitors from the fourth planet orbiting the double star Sirius 2 million years ago. This explains why the Egyptians and the Zulu tribe in South Africa knew that the exact period of orbiting of the double star Sirius is 52 years.<sup>13</sup> Our modern science found it to be about 50 years. Ancient Egyptian texts claim that our ancestors worshipped these extraterrestrials as Gods for 23,200 years.<sup>13</sup>
