

Appendix 1

Preparation of abstracts during independent work of music students.

Students themselves choose a topic from 100 options (from the Program). The teacher helps to draw up a detailed Plan of the essay, which has sections on the musician's safety: causes of dangers, forecasting dangers, designing a personal security system, conclusions and suggestions. Appendices of recommendations on the topic and humor from the Internet (as a vaccination against excessive dramatization) are required. A draft of the essay with an introduction, conclusion, list of literature and appendices is sent to the teacher for review, and then with comments is returned to the student for revision, with the provision of additional materials on the topic. This cycle was repeated on average 2-3 times. Everything in electronic form by mail. Oral explanations in class or by phone are possible. The average volume of the essay is 16-18 pages, and with appendices and illustrations from the network up to 30 pages.
