

Why should our science accept the fact that we have a quantum computer in our subconscious

Editorial

Now, when we started to make Quantum Computers and Artificial Intelligence, it is time for our science to acknowledge that we have a Quantum Computer at Subconscious level, for the existence of which we are not consciously aware.¹ It operates with the waves of our weak informational nonlinear electromagnetic field (NEMF),² which we see as aura and we call it also Spirit. As you shall see from this article, learning to use this Quantum Computer would make us super-humans or super-intelligent humans because it is a treasure box that would allow us to communicate telepathically, to foresee the future and see the past, to dematerialize things that endanger our lives, etc., which is crucial for our new cosmic and earth endeavors.

From hypnosis we know that hypnotized people with sleeping Conscious can calculate 10,000 times faster, which reveal the existence of supercomputer in our Subconscious.^{3,4} From acupuncture we know that all our organs are holographically represented on our palms, our feet, our ears, our tongue, and our irises.⁵ And all acupuncturists know that they can treat the sick organ with equal success on any of these holographic representations. The holographic representations of all our organs at 5 different locations of the body are here to tell us that all our organs are ruled and regulated on holographic principle.

Holographic tri-dimensional images are created with laser light or laser waves. Holographic representations of all our organs on the body surface mean that all organs are ruled and regulated with waves. Since hypnotized people with sleeping Conscious can calculate 10,000 times faster, obviously in the Subconscious we have a supercomputer, which works with waves. It must be a Quantum Computer and this Quantum Computer rules and regulates all our organs and everything else in the body on the holographic principle. If so, learning how to access and use the Quantum Computer could allow us to have a full control over all the processes in the body.

What else this Quantum Computer can do? Being a Quantum Computer, it can make quantum jumps to the future and allow us to foresee the future, or make quantum jumps to the past and see the past. It is called clairvoyance.⁵ Understanding and accepting clairvoyance as a feature, which our Quantum Computer allows us to have, would help our science to progress forward with big quantum jumps. The waves, with which our Quantum Computer operates, could also allow us to govern different types of techniques on wireless principle or dematerialize objects, which endanger our life. All objects (and subjects) in the material world are glued together through the waves of the NEMF, with which our Quantum Computer operates.

There are miraculous bloodless and painless surgeries performed on some islands in the Pacific by highly Spiritual individuals and nobody was able to understand and explain how this miracle was done. Here I am stepping in and offering an explanation – it is another miracle of the Quantum Computer. It is done with the waves, with which our Quantum Computer operates – the waves of our NEMF, seen as aura and called Spirit. When these NEMF-waves are made stronger and fully coherent, they like scalpel disconnect the cells, but

while the scalpel cuts through the cells, the coherent NEMF-waves leave the cells whole piece, just disconnecting the weak informational NEMF that connects the cells.

The Russian Acad. Grabovoi, who has a full access to his Quantum Computer, can make, through the waves of his Quantum Computer, the elevator to stop at the desired floor without pressing the floor button. He can also record his voice on a CD without being physically there by sending (teleporting) his voice there. He can see if a CD has a virus by just looking at the CD's aura - if the aura is colored the CD has a virus. When he removes the color with his Mind, which is part of the Quantum Computer, the CD is free from the virus. For the ability of Acad. Grabovoi to resurrect people and restore organs, which had been surgically removed many years ago, there will be another article.

The Russian Acad. Grabovoi⁶ also claims that if we want to create artificial intelligence (AI), we need to be sure that they (AI) will never go against us. For this reason, we need to study how to control them with our Mind, which is indelible part of our Quantum Computer, and to study how to materialize and dematerialize objects. Then we should put in their hardware that if they would ever dare to go against us, they would be dematerialized. This should be rule #1 for all artificial intelligence (AI) – not to go against their creators - because if they do, they would be dematerialized.¹

Telepathic communications are also done through the Quantum Computer - they are a resonance between the Quantum Computers of the telepathically communicating individuals. Acad. Grabovoi was born with access to the Quantum computer, but surprisingly, he is doing all these miraculous things, but don't ask him how he is doing them - his explanation is he is doing it with his conscious Mind and if this were the case everybody else should be doing them. He is not aware that he is doing these "miracles" through the Quantum Computer in his Subconscious, which operates with the waves of his NEMF (SPIRIT).
